English

Malayalam

French

German

Tamil

ABOUT

I am a recent Mechanical Engineering grad, passionate about captivating web applications with REST APIs, ReactJs, Tailwind CSS, MySQL, and HTML. Proven skills in problem-solving using Java and showcased through Weather, chatbots, React-Chat, and E-commerce sites. Led Brake Subsystem at SUPRA 2022 & Formula Bharat 2023, FSAE CAR production. Proficient in Java, JavaScript, and Object-oriented programming. Confident in Java, ReactJs, CSS preprocessors (Sass, Less, Stylus), and carbon design systems. Familiar with code versioning (GitHub), Agile Scrum, IBM's Carbon design systems, and cross-browser compatibility. Advocate responsive design, front-end best practices, and cross-browser compatibility. Committed to accessible, localized UIs. Effective English communicator, and global team player. Over 2 months of software experience.

PROFESSIONAL EXPERIENCE

Front-end developer (Intern)

Foxital   June 2023 - August 2023

- Played a key part in developing user interfaces that were interactive and intuitive, which enhanced user engagement and improved usability metrics.
- Utilized my expertise in JavaScript, React JS, and HTML/CSS to craft visually appealing and highly functional websites that aligned with the company's vision.
- Integrated front-end elements with back-end systems in coordination with back-end developers to ensure smooth data flow and operation throughout the entire program.

PROJECTS

Chat-Application

Developed a dynamic chat application using React, Tailwind CSS, and Appwrite with seamless real-time messaging and user interface integration. Single-room chat for multiple users. Tried and tested with 15+ users.

E-Commerce and Chatbot

Using React and Tailwind CSS, I developed an E-commerce website that was effortlessly connected with RapidAPI for effective API interactions. I provided the best user experiences and facilitated easy product browsing, selection, and checkout by utilizing responsive design and intuitive UI. And developed a chatbot that created an interactive and dynamic user experience, enabling seamless conversations and efficient information retrieval.

Weather Application

Utilized RapidAPI to integrate APIs while developing a weather app using React with Tailwind CSS. Provided clients with precise and timely weather information for improved planning and decision-making by delivering real-time weather data and forecasts via an easy interface.
